

As a shareholder of Global Crossing (GX) I am aware that a Court Hearing will be held on Sept. 24, 2003. Whilst I fervently support COMMAXXESS offer which will provide post bankruptcy interests for shareholders, I also have complete trust in COMMAXXESS' CEO Karl Schwarz, a "TRUE AMERICAN PATRIOT" who stands for HONOR and INTEGRITY, and thus deserves to be at the helm of such an important asset and company as that of GX.

COMMAXXESS has finally found a former GX engineer with enough guts to tell all about what GX was doing to falsify the books, cover up money being taken out the back door and used to put the company under through offshore shorting schemes, including illegal schemes.

COMMAXXESS is feared on Wall Street because those firms know that they are onto the scam and will not look the other way. It is for this reason that GX invited Leucadia National to participate as a buyer of GX to prevent COMMAXXESS from taking over GX and cleaning it up once and for all and not blowing out the shareholders. (We, shareholders, are included in the offer)

As an ordinary citizen, it is not for me to comment on politics. However, the deal with STT, a foreign concern does involve the Singapore government and their partner with China COSCO (11.5% stake in Temasek).

In light of the recent Blackouts, it is a wake-up call that this important Fiber Optic network (one of its kind) should not be given away to foreigners at such a cheap price, especially when frauds are involved.

GX/STT could not arguably say it is to the best interest of customers, inter-government trade or to the companies. In fact all points to the contrary which would serve in later years, had the deal gone through, to query the integrity of FCC and its honesty to make such a decision.

I sincerely hope you will put the Americans interest first before any other government, trades or politics.
